

**Smoler Proteomic Center**  
**Academic institutions price list-2016**

**Sample preparation**

- \***Protein Extraction:** 200 ₪ per sample
- \***1D- gel electrophoresis:** 250 ₪ per gel

**Protein identification by Mass Spectrometry-**

- \***Protein trypsinization and identification by mass spectrometry from a simple mixture / gel band, including 1-2hr chromatography gradient:** 450 ₪ - per sample

(This price does not include *de novo* sequencing).

10% Discount will be given for 10 samples and above.

- \* **Protein trypsinization and identification by mass spectrometry from a complex mixture including 4hr chromatography gradient:** 850 ₪ - per sample
- \* **Analysis against additional data base:** an addition of 100 ₪

**Quantitative Protein Analysis -**

- \* **Comparative quantitative analysis of 2 samples including 1D 4hr chromatography gradient, using SILAC or reductive dimethylation labeling -** 1700 ₪
- \*Technical repeat - 1100 ₪ addition
- \* **Comparative, quantitative, label- free analysis of a complex mixture including 1D 4hr chromatography gradient -** 1000 ₪
- \* **Comparative, quantitative, label- free analysis of a simple mixture including 1D 1-2hr chromatography gradient -** 550 ₪
- \* **Quantitative/qualitative analysis in additional software:**  
20% of the original project value according to an updated price list

### Modification analysis-

- \* **N-Terminus labeling** - an addition of 200 ₪ per sample
- \* **Phosphopeptide enrichment of simple mixture** - an addition of 300 ₪ per sample
- \* **Specific modifications analysis** - 550 ₪
- \* **Proteomic & Phosphoproteomic analysis of a mixture (without fractionation) including 1D 4hr chromatography gradient** - 2500 ₪

All prices refer to the use in one proteolytic enzyme per sample

All prices do not include V.A.T

Please contact our lab for any farther inquiry.

Regards,

Tamar Ziv Ph.D
